INDEX OF THE PROCEEDINGS OF THE ASSOCIATION OF OFFICIAL AGRICULTURAL CHEMISTS, INC. 1931–1940, INCLUSIVE

AUTHOR INDEX

A

Adams, J. Richard, comparison of Official and MacIntire-Shaw-Hardin methods for determining available phosphoric acid (paper), **22,** 397
See also Ross, W. H.

Adams, J. Richard, & W. H. Ross, phosphoric acid, **21,** 268

Adler, Howard, carbon dioxide in self-rising flour, **20,** 365; **21,** 398

Alexander, Lyle T., book review, **21,** 156

Alfend, Samuel
eggs and egg products, **14,** 395; **15,** 331; **16,** 293
spices and other condiments, **23,** 578
unsaponifiable matter in flour and alimentary pastes and water-soluble protein precipitable by 40 per cent alcohol in alimentary pastes, **14,** 500
See also Mitchell, Lloyd C.

Allen, H. R.
filtering before addition of platinic chloride in analysis of fertilizers for potash (paper), **22,** 162
insoluble residue in potassium chloroplatinate obtained in analysis of certain fertilizers for potash (paper), **21,** 134

Allen, H. R., & Lelah Gault, use of silica dishes in official method for determination of potash in fertilizers (paper), **20,** 101

Allen, William Marshall, obituary notice, **23,** 99

Ambler, J. A., sugar and sugar products, **17,** 156

Anderson, E. L.
determination of nitroglycerin in drug preparations (paper), **15,** 140
essential oils, **17,** 471

B

Babcock, Stephen Moulton, obituary, **15,** No. 1, iii, 98

Badger, C. H.
radioactivity of foods and drugs, **19,** 511
waters, brine, and salt, **18,** 392; **19,** 375

Bailey, E. M.
coffee, **17,** 380
committee on recommendations of referees, **14,** 39; **15,** 37; **16,** 41; **17,** 42; **18,** 45
committee on resolutions, **20,** 91
committee to collaborate with A. P. H. A. on standard methods of milk analysis, **16,** 88; **17,** 80; **18,** 90; **19,** 109; **21,** 98; **22,** 104; **23,** 91
editorial committee, *Methods of Analysis*, **19,** 40; **20,** 43; **21,** 57; **23,** 44
methyl alcohol, **19,** 191
obituary on Edward H. Jenkins, **15,** No. 3, iii
president's address, **14,** 18
See also Fisher, H. J.

Bailey, E. M., & W. J. Mathis, coffee, **16,** 567

Bailey, L. H.
ash in flour, macaroni products, and baked products; chlorides in baked products; and moisture in baked products containing fruit, **18,** 562; **19,** 540; **20,** 351; **21,** 388; **22,** 522; **23,** 480
sampling and determination of moisture in alimentary paste, bread, and baked products, **14,** 488; **15,** 592; **16,** 512; **17,** 402
starch in flour, **14,** 486

Baker, George L., pectic material as constituent of nitrogen-free extract (paper), **23,** 137

Balch, R. T.
committee on standard scale for immersion refractometer, **16,** 85
sugars and sugar products, **14,** 154; **15,** 176; **16,** 155

Balls & Martin, amylase of virus-infected tobacco (paper, ref.), **21,** 358

Balls & Tucker, activity of lipase at low temperatures (paper, ref.), **21,** 358

Balls, A. K.
enzymes, **16,** 479; **18,** 390; **19,** 372; **21,** 357; **23,** 446
importance of enzyme analysis in agricultural chemistry (paper), **17,** 531
quantitative determination of enzyme action (paper), **15,** 131

Balls, A. K., & W. S. Hale
enzymes, **19,** 372
estimation of catalase in agricultural products (paper), **15,** 483
hydrogen peroxide (note), **16,** 395
peroxidase in agricultural products (paper), **16,** 445
proteolysis in flour (paper), **18,** 135

Balls, A. K., T. L. Swenson, & L. S. Stuart, assay of papain, **18,** 140

Barackman, R. A., carbon dioxide in self-rising flours, **22,** 543; **23,** 502

Barnard, H. E., products of corn (paper, ref.), **17,** 391

Barnes, J. W., obituary notice, **14,** 95

Bartholomew, E. T., & E. C. Raby, photo-electric turbidimeter and alkaline titration method for determination of small amounts of hydrocyanic acid (paper), **19,** 472

Bartholomew, R. P., & K. D. Jacob, availability of iron, aluminum, and other phosphates (paper), **16,** 598

Bartlett, James Monroe, obituary, **19,** No. 2, iii, 114

Bates, Frederick, committee on quartz plate standardization and normal weight, **16,** 39

Batscha, J., & S. Reznek, determination of isopropyl alcohol by immersion refractometer (paper), **20,** 107

Beacham, Jr., L. M.
objective method for measuring grittiness in canned pears (paper), **22,** 766

rapid method for chlorides in tomato products (paper), **22,** 765
tomato products, **23,** 353
Beacham, Jr., L. M., & V. B. Bonney, ascorbic acid content of Florida citrus fruits (paper), **20,** 517
Beadle, B. W., *see* Perkins, Alfred T.
Beardsley, C. L., *see* Taylor, Jr., L. V.
Beattie, W. R., book review, **23,** 172
Beeson, K. C.
spices and other condiments, **14,** 525
See also Hill, W. L., Jacob, K. D., & Ross, W. H.
Beeson, K. C., & John B. Kershaw, apparatus for study of chemical reactions under mechanical pressure (paper), **17,** 320
Benne, E. J., W. Wolman, R. P. Hibbard, & E. J. Miller, comparison of Petering-Wolman-Hibbard procedure for determining carotene, and two modifications thereof with Peterson-Hughes-Freeman technic (paper), **23,** 709
Bennett, Thompson N., *see* Callaway, Jr., Joseph
Berman, S. M.
acetphenetidin in presence of caffeine and aspirin, **19,** 520; **20,** 574
stability of potassium iodate volumetric solutions, **19,** 537; **20,** 590
Berman, S. M., J. J. Chap, & D. M. Taylor, rapid determination of iron in pharmaceuticals with aid of cupferron and an immiscible solvent (paper), **20,** 635
Berry, E. H., lead, **14,** 452
Beyer, G. F.
application of neutral wedge photometer to quantitative determination of methanol in distilled spirits (paper), **22,** 151
new method for reading color of whiskey (paper), **22,** 156
volatile acids in distilled spirits, **22,** 222; **23,** 192
whiskey, rum, and brandy, **19,** 185
Bidwell, G. L.
baking powder, **19,** 412
obituary, **20,** No. 3, iii, 275; **21,** 104
obituary on Andrew Stuart Mitchell, **16,** No. 1, iii
Bigelow, W. D.
obituary, **22,** No. 4, iii; **23,** 97
Wiley Memorial Lecture No. IV, **18,** 21
Wiley—the Public Servant, **14,** No. 1, xiv
Blaisdell, A. C., *see* Schicktanz, S. T.
Blanck, F. C.
committee on resolutions, **17,** 93
editorial committee, **17,** 37
obituary on Willard Dell Bigelow, **22,** No. 4, iii
president's address, **19,** 34
Blish, M. J.
diastatic value of flour, **15,** 572; **16,** 497; **17,** 394; **18,** 566; **19,** 546
experimental baking tests, **14,** 494
glutenin in flour, **14,** 484
Bohn, Ralph M., biscuit and cracker manufacture (paper, ref.), **18,** 562
Bond, Henry R.
arecoline hydrobromide, **23,** 764
hypophosphites, **17,** 437; **18,** 525; **19,** 516; **20,** 555; **21,** 529; **22,** 712
Bonnar, R. U.
book review, **19,** 174
electrometric titration of acidity, **20,** 203; **21,** 236; **22,** 362
See also Dahle, Dan
Bonney, V. B.
apparatus for determining tenderness of canned foods (paper, ref.), **15,** 626
canned foods, **16,** 335; **18,** 202; **19,** 254; **20,** 216; **21,** 244; **22,** 370; **23,** 352
refractometric determination of soluble solids in jam and jelly, **15,** 384
See also Beacham, Jr., L. M., & Rowe, S. C.
Bonney, V. B., & S. C. Rowe, chemical studies on maturity of canned peas (paper), **19,** 607
Bopst, L. E., appointed to editorial committee of *Journal*, **21,** 106
Bornmann, J. H.
fat by acid hydrolysis, lipoids, lipoid phosphoric acid (P_2O_5), and total phosphoric acid (P_2O_5) in eggs, **14,** 416
lipoids and fat in alimentary pastes and baked products, **14,** 489; **15,** 594
rapid determination of mineral oil in butter (note), **22,** 194
rye in flour mixtures, **16,** 520; **17,** 405
Brackett, R. N.
committee A, **15,** 38; **16,** 42
nominating committee, **16,** 101
obituary, **21,** No. 2, iii; **22,** 113
Bratzler, J. W., *see* Shrewsbury, C. L.
Breazeale, Edward L., *see* Greene, Robert A.
Brewer, C. M., disinfectants, **21,** 417; **23,** 557
Brooke, C. L., ergot in flour, **18,** 592; **19,** 569
Broughton, L. B.
committee B, **21,** 64; **22,** 55
oil of chenopodium, **14,** 341
Brown, L. R., corn products, **23,** 513
Browne, C. A.
book review, **17,** 343
committee on necrology, **14,** 94; **15,** 98; **16,** 100; **17,** 90; **18,** 99; **19,** 114; **20,** 90; **21,** 104; **22,** 113; **23,** 97
committee on Principles and Practice of Agricultural Analysis, **15,** 33; **16,** 37; **17,** 38; **18,** 41; **19,** 42
committee on quartz plate standardization and normal weight, **17,** 39
committee on resolutions, **15,** 101; **18,** 102
impressions of agricultural chemistry in foreign countries (paper), **14,** 101
obituary on Captain Rufus Edwards Rose, **15,** No. 3, iii
obituary on Clifford Richardson, **15,** No. 4, iii
origin and application of term nitrogen-free extract in valuation of feeding stuffs (paper), **23,** 102
special applications in methods of agricultural chemical analysis (paper), **15,** 112
sugars and sugar products, **18,** 157; **19,** 394; **20,** 394; **21,** 418
Wiley Memorial Lecture No. VII, **21,** 26
Wiley—the Chemist, **14,** No. 1, vii
See also Phillips, Max
Browne, Louise McDanell, book review, **19,** 501
Bryan, Thomas Joseph, obituary notice, **23,** 99
Bubb, John C., method for determination of lead and copper in Bordeaux-lead arsenate mixtures (paper), **14,** 260

Burlage, Henry M.
assay of lead oleate plaster and ointment of lead oleate (paper), **23,** 787
psyllium, **18,** 557; **19,** 532
santonin, **14,** 321; **15,** 417; **16,** 346
Burlage, Henry M., & Albert C. Smith, assay of santonin-bearing drugs (paper), **15,** 491
Butler, Lillian
sodium in plants, **17,** 275
See also Winter, O. B.
Byall, S., polariscopic methods, **15,** 198; **16,** 175; **17,** 168
Byers, H. G., importance of trace elements in soils (paper, ref.), **18,** 203

C

Callaway, Jr., Joseph
benzyl compounds, **16,** 362; **17,** 443; **18,** 535
bismuth compounds in tablets, **14,** 347; **15,** 422
detection of decomposition in eggs, **19,** 201; **20,** 155; **21,** 179; **22,** 298
Callaway, Jr., Joseph, & Thompson N. Bennett, esters as adulterants of cassia oil, and their detection (paper), **14,** 571
Callaway, Jr., Joseph, & S. Reznek, determination of small quantities of benzyl alcohol (paper), **16,** 285
Calvery, Herbert O., book review, **19,** 173; **21,** 706
Cameron, E. J.
canned vegetables, **23,** 607
culture media for non-acid products, **19,** 423; **20,** 429
methods for detecting and estimating numbers of thermophilic bacteria in sugar, **19,** 438; **21,** 457; **23,** 608
microbiological methods, canned vegetables, **21,** 452
Campbell, Elmer W., cosmetics, **22,** 517
Campbell, F. H., estimation of esters in distilled liquors (note), **14,** 576
Campbell, W. G., Wiley—the Leader, **14,** No. 1, ix
Cannon, J. H.
benzedrine, **23,** 764
gums in drugs, **17,** 468; **18,** 552; **19,** 528; **20,** 588; **22,** 726; **23,** 764
See also Clarke, J. O., & Field, J. T.
Capen, Ruth G.
crude fiber in alimentary paste, bread, and baked products, **16,** 518; **17,** 404; **18,** 573
See also Davidson, Jehiel
Carlyle, E. C., *see* Fraps, G. S.
Carol, Jonas
elixir of terpin hydrate and codeine, **21,** 575; **22,** 736; **23,** 757
hexylresorcinol, **16,** 384
separation and estimation of *p*-phenylenediamine in mixtures (paper), **23,** 821
Carrick, L. L., accelerated weathering test of paints, **20,** 350
Carroll, John S., obituary notice, **18,** 647; **19,** 115
Carter, R. H., fluorine compounds, **20,** 394
Cassil, C. C.
arsenic, **20,** 171; **21,** 198; **22,** 319; **23,** 297
See also Davidson, Jehiel, and Smith, C. M.
Cassil, C. C., & H. J. Wichmann, rapid volumetric micro method for determining arsenic (paper), **22,** 436
Caughey, R. A., E. B. Holland, & W. S. Ritchie, zinc, **21,** 204
Cavanaugh, George Walter, obituary notice, **22,** 114
Cavett, Wm. C., mercurials, **18,** 520
Chap, J. J., *see* Berman, S. M.
Chesnut, Victor King, obituary notice, **22,** 113
Clark, A. W., *see* Kertesz, Z. I.
Clark, E. P.
book review, **21,** 705
determination of sulfur in organic compounds by semimicro Carius method (paper), **18,** 476
electrically heated sand bath (paper), **16,** 418
microanalytical methods (paper), **16,** 255
microchemical methods, **17,** 382; **18,** 439; **22,** 622
semimicro determination of carbon and hydrogen (paper), **16,** 414
semimicro determination of halogens in organic compounds (paper), **17,** 483
semimicro determination of nitrogen by Dumas method (paper), **16,** 575
Vieböch and Schwappach method for determination of methoxyl and ethoxyl groups (paper), **15,** 136
See also Hillig, Fred
Clark, E. P., & Fred Hillig, concerning Dyer method for identification and determination of volatile fatty acids (paper), **21,** 684
Clark, G. R., determination of 1,4 dihydroxy-anthraquinone in D&C green No. 5 (paper), **22,** 784
Clark, Rowland, J., hydrogen-ion concentration of flour, **16,** 495; **17,** 392; **18,** 563
Clarke, I. D., leathers and tanning materials, **19,** 392
Clarke, J. O.
committee C, **15,** 52; **16,** 55; **21,** 60; **22,** 60
radio talk, **15,** 608
Clarke, J. O., J. H. Cannon, E. W. Coulter, M. S. Goodman, W. S. Greene, K. L. Milstead, R. L. Vandaveer, & J. D. Wildman, detection of decomposition products in butter and cream (paper), **20,** 475
Clay, C. L. pyridium, **18,** 551
Clevenger, J. F.
cubeb, **20,** 602; **21,** 566
ginger, **20,** 410
resin and volatile oil in cubebs (paper), **20,** 140
spices, **15,** 626 (ref.); **16,** 557; **17,** 371; **18,** 417; **19,** 411; **21,** 435; **22,** 598
volatile oil in cardamon seed (paper), **17,** 283
volatile oil in mace and nutmegs (paper), **18,** 611
volatile oil in marjoram (paper), **21,** 109
volatile oil in sage (paper), **22,** 683
Clifcorn, L. E., *see* Griem, W. B., and Meloche, V. W.
Clifford, P. A.
coffee, **14,** 533
determination of citric acid (note), **14,** 298
determination of lead in spray residue (note), **21,** 218
fluorine, **23,** 303
lead in baking powders and baking chemicals, **21,** 437
lead in foods, **19,** 232; **20,** 191; **21,** 212; **22,** 339, **23,** 307

moisture in dried fruit, **17,** 215
some notes on stability of dithizone solutions (paper), **21,** 695
See also Wichmann, H. J.
Clifford, P. A., & H. J. Wichmann, dithizone methods for determination of lead (paper), **19,** 130
Clulow, J. W., observations on determination of ash in feeding stuffs (paper), **21,** 674
Coe, Mayne R.
baking powder and baking chemicals, **14,** 250
direct determination of available carbon dioxide in baking powder (paper), **14,** 99
rye flour in bread, **15,** 601
Cohen, Albert I., cinchophen in presence of salicylates, **21,** 554
Cohen, Isadore, daphnia methods, **23,** 750
Coleman, D. A.
ash, flour color, and chlorine in flour, alimentary paste, and baked products, **15,** 565; **17,** 391
obituary notice, **23,** 100
Collins, E. R., & F. R. Speer
decomposition of dolomitic limestone in fertilizers (paper), **23,** 373
decomposition of dolomitic limestone in soils when used as neutralizing agent in complete fertilizers (paper), **22,** 142
Conrad, Carl M., book review, **23,** 735
Cook, Frank E., & Harvey Miller, preliminary investigation of Lichthardt test for detection of caramel in cider and distilled vinegars (paper), **22,** 588
Copeland, L. E., *see* Magraw, D. A.
Coulson, E. J., copper in foods, **19,** 219; **20,** 178
Coulter, E. W.
fat in malted milk, **23,** 465
See also Clarke, J. O.
Crooks, G. Chapman, book review, **22,** 197
Cross, L. J., gums in foods, **17,** 380; **18,** 432
Curl, A. L., *see* Mathews, J. A.
Curl, A. L., & E. K. Nelson, observations on colorimetric method for vanillin (paper), **22,** 684
Curl, A. L., & R. A. Osborn, selenium, **21,** 228
Curphey, J. D., F. A. Rotondaro, & D. M. Taylor, estimation of calomel in compound cathartic pills (paper), **22,** 118
Curtis, P. B.
adulteration of condensed milk products and cod liver oil, **22,** 676; **23,** 656
stock feed adulteration, **20,** 434; **21,** 595

D

Dahle, Dan
book review, **21,** 158
committee on auditing, **21,** 103
fluorine in baking powders and baking chemicals, **21,** 435
fluorine in feeding stuffs, **20,** 433; **21,** 594
fluorine in foods, **17,** 204; **18,** 194; **19,** 228; **20,** 188; **21,** 208; **22,** 338
new procedure for determination of fluorine by peroxidized titanium method (paper), **20,** 505
See also Wichmann, H. J.
Dahle, Dan, R. U. Bonnar, & H. J. Wichmann, titration of small quantities of fluorides with thorium nitrate (paper), **21,** 459, 468
Dahle, Dan, & H. J. Wichmann
determination of fluorine in presence of large excess of aluminum ions (paper), **19,** 320
further studies of fluorine in distillation (paper), **20,** 297
quantitative study of fluorine distillation (paper), **19,** 313
Daniel, Harley A., & Horace J. Harper, modified sulfocyanate procedure for determination of small quantities of iron (paper), **17,** 286
Daughters, George T., ash in fruit products, **14,** 463
Davidson, Jehiel
determination of plant ash constituents in presence of silica (paper), **14,** 551
quantitative adaptation of codeine test to colorimetric determination of selenium in plant materials (paper), **22,** 450
Davidson, Jehiel, & Ruth G. Capen, colorimetric methods for determination of manganese in plant materials (paper), **14,** 547
Davidson, Jehiel, George N. Pulley, & C. C. Cassil, determination of small quantities of antimony in tartar emetic spray residues (paper), **21,** 314
Davidson, L. G., Kjeldahl digestion of sugarcane juice (note), **23,** 171
Davies, J. R., phosphated flour, **22,** 559
Davis, R. O. E., *see* Yee, J. Y.
Dawson, L. E., obituary notice, **14,** 95
Dawson, P. R., *see* Schricker, John A.
Dawson, P. R., E. F. Snyder, W. R. Leighty, & F. R. Reid, decomposition of dolomitic limestone in soils when used as a neutralizing agent in complete fertilizers (paper), **22,** 137
Dayharsh, C. A., *see* Hubbard, W. S.
Deahl, Neulon, *see* Lynch, H. J.
Deal, Ernest C.
belladonna & stramonium ointments, **15,** 442
calcium, **14,** 369
mercurials, **17,** 432
Deemer, R. B., board of editors, *Journal*, **14,** 34; **15,** 32
Deemer, R. B., & J. A. Schricker, determination of arsenic in plant materials (paper), **16,** 226
Delorme, Joachim, *see* Riou, Paul
deLoureiro, J. A., improved technic in toluene distillation method for determination of moisture in foodstuffs (paper), **21,** 645
Denny, F. E.
nitrogen-free extract from plant physiological viewpoint (paper), **23,** 151
Wiley Memorial Lecture No. II, **16,** 19
Deszyck, E. J., *see* Smith, John B.
Dietz, W. H., *see* Saywell, L. G.
Dohme, A. R. L., Wiley Memorial Lecture No. III, **17,** 19
Donovan, C. G.
determination of thallous sulfate in ant poisons, **22,** 411
electrolytic method for determination of copper and lead in Bordeaux-lead arsenate mixtures (paper), **15,** 289
fluorine compounds, **23,** 547
Drabkin, D. L., copper, **21,** 203; **22,** 320; **23,** 301
Dunbar, P. B.
never-ending problems of the regulatory chemist (paper), **16,** 455
proposed food and drug legislation (paper), **18,** 113
Wiley Memorial Lecture No. IX, **23,** 29

Dunlap, F. L., book review, **21,** 704
Dunlap, R. W., address, **15,** 605
Dustman, R. B., effect of certain solvents and of sequence of extraction on removal of fat and ash constituents from bones of chicks (paper), **20,** 469

E

Eaton, E. O.
emodin-bearing drugs, **14,** 311; **15,** 406; **16,** 342
morphine in sirup, **17,** 446; **18,** 539
theobromine calcium, **19,** 534
Elliott, F. L.
menthol, **14,** 337
tetrachlorethylene, **16,** 383
Elliott, Louis D., obituary on Robert Silver Hiltner, **14,** No. 4, 393
Elvehjem, C. A., biological methods for vitamin B complexes, **18,** 354; **19,** 595; **21,** 622
Emmert, E. M.
colorimetric method for determination of carbon dioxide (paper), **14,** 386

Baking powders and baking chemicals, **14,** 59, 80, 250; **15,** 65; **16,** 67, 71; **17,** 59; **18,** 60; **19,** 63, 74, 412; **20,** 65; **21,** 75; **22,** 67, 74, 340, 599; **23,** 72, 82
fluorine in, **21,** 435
lead in, **21,** 437; **22,** 340
Baking test, experimental, **14,** 479, 494; **15,** 602; **16,** 525; **17,** 409
Barbital and phenobarbital, **19,** 106, 508; **20,** 80, 553; **22,** 59, 704; **23,** 60, 742
Barfoed's reagent, **15,** 619
Barium in lipsticks, cream rouges, and lake dyes, **22,** 518
Barley malt, proteolytic activity, **20,** 307
Basal rachitic ration, **20,** 72
Baselt's apparatus for determination of air in packaged beer, **21,** 322
"Basic" lime phosphate (lime based superphosphate), definition, **17,** 41; **18,** 43
Bat manure and guano, definition, **19,** 45; **20,** 45; **21,** 58; **22,** 46
Beans, canned snap (stringless), study of chemical and physical methods for determining maturity **19,** 620
Beef heart broth and agar, **21,** 451
Beer, **20,** 143, 145; **22,** 202; **23,** 182
analyses, intensified study of use of refractometer as check, **21,** 121
analytical methods applicable to, **21,** 318
and carbonated beverages, CO_2 in, **19,** 162
carbon dioxide in, **19,** 162; **21,** 164; **22,** 73, 207
iron in, **19,** 489
sulfur dioxide in, **23,** 189
Beers, **18,** 51, 75; **19,** 56, 76, 175, 176
sulfur dioxide in, **21,** 175; **22,** 220; **23,** 189
wines, and distilled liquors, **15,** 51, 72; **18,** 51, 75; **19,** 56, 75, 175
Belladonna and stramonium ointments, **15,** 50, 83, 397, 442
Benzaldehyde
in beverages, **19,** 75
in cordials and liqueurs, **19,** 81, 182
Benzedrine, **22,** 705; **23,** 57, 740, 764
Benzoate of soda, **22,** 305
Benzocaine, **16,** 84; **23,** 745
Benzoic acid
compound ointment, **23,** 745
identification in commercial flavors, **16,** 581; **21,** 93
Benzoyl peroxide in flour—detection as benzoic acid, **17,** 302
Benzyl alcohol, determination of small quantities, **16,** 285
Benzyl benzoate, **18,** 53, 513
Benzyl compounds, **16,** 52, 340, 362; **17,** 52, 443; **18,** 535; **19,** 504; **20,** 55, 547, 560
Benzylmorphine, **21,** 91
Berberine, **22,** 88
B-ionone
in commercial flavors, **22,** 378, 389, 690
in raspberry flavors, **22,** 386
Beverages
alcoholic, **19,** 175; **20,** 63, 143; **21,** 73, 159; **22,** 65, 199; **23,** 68, 173

sulfur dioxide in, **20,** 610
carbonated, carbon dioxide in, **19,** 162
non-alcoholic, and flavors, **14,** 68, 518; **15,** 63, 538; **16,** 65, 541; **17,** 60, 364; **18,** 60; **19,** 62, 74, 407; **20,** 65, 407; **21,** 75, 433; **22,** 67, 593; **23,** 72, 572
Biazzo method, **19,** 222
Bibliography, report of committee, **15,** 97
Bidwell-Sterling method, moisture in fertilizers, **15,** 272
Bioassays of drugs, **14,** 51, 305, 325
Biological methods
cod liver oil in feed mixtures, **15,** 222; **16,** 184; **17,** 180
vitamin B complexes, **18,** 354; **19,** 595; **20,** 438; **21,** 622; **22,** 662; **23,** 653
vitamin D carriers, **18,** 54, 341, 357; **19,** 585, 598; **20,** 438, 450; **21,** 607; **22,** 656; **23,** 648
Biological testing, **16,** 55, 342; **17,** 53; **19,** 505; **21,** 66, 521; **22,** 57; **23,** 56, 739
Biourge and Nyns' selective determination of levulose, **15,** 198
Biscuit and cracker manufacture (paper, ref.), **18,** 562
Bismuth compounds in tablets, **14,** 53, 306, 347; **15,** 49, 84, 396, 422; **16,** 340; **22,** 58, 98, 701
Biuret test, **18,** 81
Bleaching powder, **18,** 65, 152
Bone phosphate, precipitated, definition, **17,** 40
Book reviews, **14,** 117, 390, 578; **15,** 500; **16,** 454; **17,** 343; **18,** 647; **19,** 173, 357, 498, 671; **20,** 142, 331, 543, 656; **21,** 156, 351, 516, 704; **22,** 196, 459, 694, 786; **23,** 172, 444, 735, 832
Books, new, **14,** 117, 118
Bordeaux-lead arsenate mixture
copper and lead content, **14,** 260
electrolytic method, copper and lead content, **15,** 289
lead oxide and copper in, **16,** 69
Boron

Committee D, **20,** 62; **21,** 72; **22,** 64; **23,** 67
Committee
on auditing, **14,** 93; **15,** 98; **16,** 99; **17,** 90; **18,** 99; **19,** 114; **20,** 88; **21,** 103; **22,** 112; **23,** 97
on bibliography, **15,** 97
on definitions of terms and interpretation of results on fertilizers and liming materials, **14,** 36; **15,** 34; **16,** 40; **17,** 40; **18,** 43; **19,** 43; **20,** 44; **21,** 58; **22,** 45; **23,** 45
on food standards, **22,** 111
on moisture, **21,** 604; **23,** 97
on necrology, **14,** 94; **15,** 98; **16,** 100; **17,** 90; **18,** 99; **19,** 114; **20,** 90; **21,** 104; **22,** 113; **23,** 97
on quartz plate standardization and normal weight, **16,** 39; **17,** 39
on nominations, **14,** 95; **15,** 100; **16,** 101; **17,** 92; **18,** 101; **19,** 115; **20,** 91; **21,** 105; **22,** 114; **23,** 101
on recommendations of referees, **14,** 39; **15,** 37; **16,** 41; **17,** 42; **18,** 45; **19,** 45, 312; **20,** 45; **21,** 59; **22,** 47; **23,** 46
on resolutions, **14,** 95; **15,** 101; **16,** 102; **17,** 93; **18,** 102; **19,** 116; **20,** 91; **21,** 106; **22,** 115; **23,** 101
on revision of soil analysis, **14,** 38
on standard scale for immersion refractometers, **16,** 85
on standardization of glassware, **23,** 97
on Wiley memorial awards, **22,** 110; **23,** 96

to confer with A.P.H.A. on standard methods of milk analysis, **16,** 88; **17,** 80; **18,** 90; **19,** 109; **21,** 98; **22,** 104; **23,** 91
to cooperate with other committees on food definitions, **14,** 91; **15,** 94; **16,** 97; **17,** 88; **18,** 90; **19,** 109; **20,** 88
to wait upon Secretary of Agriculture, **14,** 181
Committees, members of, see page 1 of each volume
Comparison
of chemical methods for estimating availability of magnesium, **23,** 404
of official and MacIntire-Shaw-Hardin methods for determinating available phosporic acid, **23,** 234
of official reducing sugar methods in analysis of raw cane sugars, **18,** 118
of two per cent citric acid and neutral ammonium citrate solutions, as solvent for phosphates, **15,** 146
Comprehensive Treatise on Inorganic and Theoretical Chemistry, book review, **14,** 118
Condiments, **14,** 70, 80, 525; **15,** 63, 78; **16,** 66, 77, 547, 557; **17,** 60, 370, 371; **18,** 60, 417; **19,** 65, 98, 411; **20,** 61; **21,** 71, 89, 435; **22,** 63, 87, 598; **23,** 66, 87, 578
Condensed milk products, adulteration, **22,** 676; **23,** 656
Conductivity values, maple products, **16,** 80; **17,** 161
Constitution, **15,** 90; **18,** 96; **19,** 111
Container, unopened, treatment, **19,** 430
Copper, **18,** 184, 192
and lead in Bordeaux-lead arsenate mixtures, **14,** 260; **15,** 289
in Bordeaux-lead arsenate mixtures, **16,** 69
in California prunes, **17,** 290
in fertilizers, **22,** 297; **23,** 273
in foods, **14,** 450; **16,** 322, 330; **17,** 198; **18,** 192; **19,** 212, 219; **20,** 167, 178, 182; **21,** 193, 203; **22,** 312, 320; **23,** 293, 301
in gelatin, **22,** 84
in plants, **19,** 72, 360
in tomatoes, **23,** 678
micro method, **20,** 182
permanganate titration method, **18,** 382
reduced
in plants, **14,** 226; **19,** 72, 360; **20,** 334
notes on permanganate method of estimating in determination of reducing sugars, **19,** 125
volumetric thiosulfate method, **18,** 83
Copper salts in stock feeds, **14,** 143; **15,** 77, 214
Copper sulfate in stock feed, **15,** 77
Cordials and liqueurs, **19,** 57, 78, 175, 180; **20,** 151; **21,** 177; **22,** 226; **23,** 198
Corn, field, iodine test, **15,** 167
Corn grits, corn meal, **19,** 91
Corn products, **17,** 391; **19,** 90; **23,** 513
Correction tables for dextrose and lactose in presence of sucrose for use in Lane-Eynon method, **15,** 624
Corrections, **15,** 168, 611; **16,** 292, 570; **17,** 473; **19,** 604; **20,** 604; **21,** 458; **23,** 101, 658
Cosmetics, **21,** 65; **22,** 55, 517; **23,** 55
Cotarnine, **22,** 88
Cottage cheese, gelatin in, **17,** 314
Cottonseed hull bran, chemical composition, **22,** 420
Coumarin
in imitation vanilla, **20,** 408; **22,** 392
quantitative determination, **22,** 392
Cream, **19,** 378
acidity, **20,** 480
decomposition products in, **20,** 475
formol titration, **20,** 480
hydrogen-ion concentration, **20,** 480
mold in, **20,** 93, 480
phosphatase test for pasteurization, **21,** 372; **22,** 497
Cream of tartar in baking powders, **22,** 74, 599
Crop Protection Institute, report of representatives on Board of Governors, **14,** 86; **15,** 87; **16,** 89; **17** 80; **18,** 91; **19,** 110; **20,** 84; **21,** 99; **22,** 105; **23,** 91
Crude drugs, **14,** 304, 308; **15,** 47, 394, 399; **16,** 51, 339; **17,** 50, 421; **18,** 52, 510, 515
Crude fiber
in alimentary paste, bread, and baked products, **16,** 518; **17,** 404; **18,** 573
in alimentary pastes and air-dried baked cereal products, **14,** 479, **493**
in cacao products, **14,** 530; **15,** 543, 546
Cube, **21,** 413; **22,** 572; **23,** 551
rotenone in, **21,** 148; **22,** 408
Cubeb, **20,** 550, 602; **21,** 67, 523, 566
Cubebs, resin and volatile oil in, **20,** 140
Culture media
for acid products, **19,** 440
for non-acid products, **19,** 433; **20,** 429
Cultures, incubation periods and temperatures, **19,** 445
Cupferron, use of, in determination of iron in pharmaceuticals, **20,** 635
Cuprous oxide, observations on determination, as applied to sugar analysis, **19,** 480
Cyanamid
definition, **17,** 41; **18,** 43; **19,** 43
water-soluble nitrogen in, **18,** 62
Cyanamide and urea nitrogen, definition, **14,** 37; **15,** 35
Cyanogenetic glucosides in feeds and similar materials, **19,** 94

D

D&C green No. 5, determination of 1,4-dihydroxyanthraquinone, **22,** 784
Dairy products, **14,** 54, 79; **15,** 56, 74; **16,** 60, 72; **17,** 56, 66, 345; **18,** 57, 77; **19,** 60, 92, 377; **20,** 58, 70; **21,** 68, 82; **22,** 60, 76; **23,** 62, 84, 451
comparison of methods for detection of gelatin, **19,** 476
difference between those made from cow's milk and those made from milk of other animals, **22,** 507
extraneous matter in, **21,** 370; **22,** 495
gelatin in, **19,** 378, 476
neutralizers in, **21,** 371; **22,** 495; **23,** 468
tests for pasteurization, **21,** 372; **22,** 497
used as feed, fat in, **17,** 190; **18,** 351; **19,** 594
vegetable gums in **21,** 110
Daphnia methods, **20,** 564; **21,** 65, 520, 533; **22,** 56, 696, 715; **23,** 56, 738, 749, 750
deClerck's arrangement for measuring *p*H reaction within the bottle, **21,** 319

deClerck's set-up for air determination in bottled beer, **21,** 320
Decomposition
of dolomitic limestone in fertilizers, **23,** 373
of dolomitic limestone in soils when used as neutralizing agent in complete fertilizers, **22,** 137, 142
of eggs and egg products, detection, **14,** 404, 425; **19,** 201; **20,** 155; **21,** 179; **22,** 298; **23,** 285
of lecithin in eggs, **15,** 282
Decomposition products in butter and cream, detection, **20,** 475
Deguelin and rotenone, improvement on Gross-Smith colorimetric method, **19,** 118
Dehydrogenation of alkali lignin from corn cobs with selenium, **21,** 632
Depilatories
sulfides in, **23,** 437
thioglycollates in, **23,** 727
Denigé's solution, **21,** 78
Densimetric methods, **15,** 194; **17,** 167
Derris, **21,** 413; **22,** 572; **23,** 551
rotenone in, **21,** 148; **22,** 408
Detection and determination of 2,4 dinitrophenol in tablets and capsules, **18,** 465
Detection of added lecithin in chocolate products, **14,** 537
Determination and occurrence of iodine in phosphate rock, **16,** 128
Dextrose
correction table (Lane-Eynon method), **15,** 624
in ampuls, **15,** 51, 398, 453; **19,** 509
in eggs and egg products, **14,** 397; **16,** 298
Dextrose solution in ampuls, **15,** 51
Diacetyl in food products, **21,** 427; **22,** 587
Diallylbarbituric acid, **22,** 89
2,4-diaminodiphenylamine, separation and determination, **23,** 719
4-diaminodiphenylamine, separation and determination, **23,** 161
Diastase-acid hydrolysis, starch in flour, **14,** 112
Diastatic activity or power of malt, **19,** 88; **22,** 200; **23,** 173
Diastatic value of flour, **15,** 572; **16,** 497; **17,** 394; **18,** 566; **19,** 546
Dictionary of Terms Relating to Agriculture, Horticulture, Forestry, Cattle Breeding, Dairy Industry, and Apiculture in English, French German, and Dutch, book review, **19,** 173
Dihydroxy-anthraquinone (1,4), determination in D&C green No. 5, **22,** 784
Dilaudide hydrochloride, **23,** 745
Dinitrophenol, **18,** 86, 523; **19,** 506; **20,** 57, 82, 549, 592; **22,** 702
Dinitrophenol (2,4) in tablets and capsules, detection and determination, **18,** 464
Dionine, **21,** 91
Disinfectants, **19,** 52, 107; **20,** 54; **21,** 64, 417; **23,** 557
Distillation, book review, **20,** 543
Distilled liquors, *see* Liquors, distilled
Distilled spirits, *see* Spirits, distilled
Dithizone method
application to determination of lead in biological materials, **21,** 481
determination of lead, **19,** 130, 217; **22,** 340
Dithizone solutions, stability of, **21,** 695
Dolomite
and magnesic limestone in 4 per cent citric acid solution adjusted to *p*H 4.0 with ammonium hydroxide, effect of particle size on solubility of magnesium in, **22,** 147
as a fertilizer supplement—its behavior and control, **16,** 589
definition, **18,** 44; **19,** 44; **20,** 44; **21,** 58; **22,** 45
of varying particle size, citrate solubility of, **22,** 180
Dolomitic limestone
decomposition of in soils when used as neutralizing agent in complete fertilizers, **22,** 137, 142
in fertilizers, decomposition, **23,** 373
Dover's powder, **22,** 703; **23,** 741
Dried eggs, *see* Eggs, dried
Dried fruits, *see* Fruits, dried
Dried milk, *see* Milk, dried
Dried skim milk, *see* Milk, dried skim
Drug analysis, **23,** 737
Drug legislation, proposed, **18,** 113
Drug preparations, nitroglycerin in, **15,** 140
Drugs, **14,** 50, 82, 301; **15,** 47, 81, 393; **16,** 51, 81, 337; **17,** 50, 74, 418; **18,** 52, 84, 509; **19,** 53, 102, 503; **20,** 55, 79, 545; **21,** 65, 91, 519; **22,** 55, 88, 695; **23,** 55, 89, 737
and Galenicals, book review, **21,** 517
bioassays, **14,** 51, 325
crude, **14,** 304, 308; **15,** 47, 394, 399; **16,** 51, 339; **17,** 50, 421; **18,** 52, 510, 515
emodin-bearing, **14,** 50, 304, 311; **15,** 47, 394, 406; **16,** 51, 339, 342
gums in, **18,** 552; **19,** 528; **20,** 549, 588; **22,** 726
organic, solubilities of, and their application to drug analysis, **16,** 571
radioactivity, **14,** 309; **19,** 101, 511
sampling, **14,** 302
santonin-bearing, assay, **15,** 491
Drying densimetric, and refractometric methods, **15,** 42, 194; **16,** 46, 173; **17,** 167; **18,** 171; **19,** 399; **21,** 421; **22,** 587
Dumas method, semimicro determination of nitrogen by, **16,** 575
Dunbar sandy loam, **22,** 142
Dyer method for identification and determination of volatile fatty acids, **21,** 684
Dyes, acid, estimation of pseudo-cumidine **22,** 771

E
